A Unique ID by the public water system for each service line.		Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for local and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmarks, Intersections, block, or other details to specify service line locations.											If "Non-Lead Other", describe in Comments field	Important for determining if service line requires replacement	Estimated date when the service line was installed or replaced	Service Line Metered or Not Metered	Drinking, Non-Drinking, Combination	Diameter in Inches	Length in Feet	Select option from drop down list. If "Other," describe in the Notes field	If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated	If "Non-Lead Other", describe in Comments field	Estimated date when the service line was installed or replaced	Diameter in Inches	Length in Feet	If Other, describe in the Notes field	If Other, describe in the Notes field	Estimated date of field verification or date that the record was updated	For example, lead gooseneck or pigtail where the water main is connected to the service line		This information may be helpful for identifying lead tap monitoring locations.								Please use this section to record any comments or notes associated with a service line.
