Franklin County Board of Health Activity Report

May-August, 2008

Vector Disease Control, Inc. (VDCI) provides a proven, scientific approach to mosquito control for the Franklin county Board of Health. VDCI's operations include larval and adult mosquito surveillance followed by the application of larvicides and adulticides. In addition, our office responds to service requests from the public.

Mosquito Surveillance

VDCI will be utilizing a total of 38 traps placed in residential and recreational areas throughout Franklin County during the 2008 mosquito season. Thirty-three of these are gravid traps, and five are CDC Light traps, which are baited with CO₂. All *Culex* species collected are tested for West Nile by either the State (PCR) or VDCI (in-house using the RAMP testing platform). Additional traps have been set in Franklin County at the request of residents' mosquito complaints or to attain additional information about changes in mosquito populations. The current average for Franklin County's mosquito count per trap night is 62.9, with a total of 37,022 mosquitoes trapped.

Larval Control Activity

Permanent water, flood water, artificial containers, and drainage system sites are inspected for larval mosquito breeding on a regular basis. In total, approximately 356 site inspections- some of which were service requests- found the presence of mosquito larvae. As a result of these inspections (not including storm drain treatment) 10,397 ounces of granular BTI (AquaBac 200g), 1,236.2 ounces of Vectolex CG, 211.46 ounces of Agnique MMF, 3,361.2 ounces of AquaBac XT, 41 Altosid SR and 279.2 Altosid XR briquettes were applied to these mosquito breeding sites. Additionally, VDCI is

continuing to eliminate breeding habitat for artificial container mosquitoes by targeting bird baths, buckets, tires etc.

Storm Drain and Catch Basin Treatment

During this reporting period, Franklin County's storm drain and catch basin treatment was completed. To date, 2,568 storm drains and catch basins have been treated with Altosid XR briquettes due to water retention.

Service Requests

Through the months of May through August, VDCI completed 215 service requests throughout Franklin County. Sources of the complaints were either through the FCBH's BITE line (614-462-2483), FCBH referral, other municipality agency referral (City inspectors), or through the FCBH web link to VDCI's email. Additionally, we have accommodated municipality requests for barrier treatments for Gahanna's Music in the Park Series, Franklin County Fairgrounds, Reynoldsburg's, Bexley's and Dublin's 4th of July celebrations, the Dublin Irish Festival, Reynoldsburg's Tomato festival, and Huber Park's free movie night. During this reporting period we have used 6,306.8 ounces of Suspend SC for the barriers.

Summary

The month of August was unseasonably cool and dry, which made for lower than typical mosquito activity. VDCI has utilized this brief mild spell by focusing on heightened control of larval populations, inspecting and treating problematic areas, educating the public and adult mosquito surveillance. VDCI will remain diligent in our surveillance and control activities to prevent a further significant increase in the mosquito population. Throughout the upcoming months, we will analyze trap data and test results to examine the necessity of adulticiding. As always, VDCI welcomes residents with any mosquito-related questions or concerns to contact Franklin County's Mosquito Control Program Bite Line at 614-462-BITE.
