

# AnyConnect VPN Client - Manual iPad Installation

## Step 1

Open a web browser and go to:

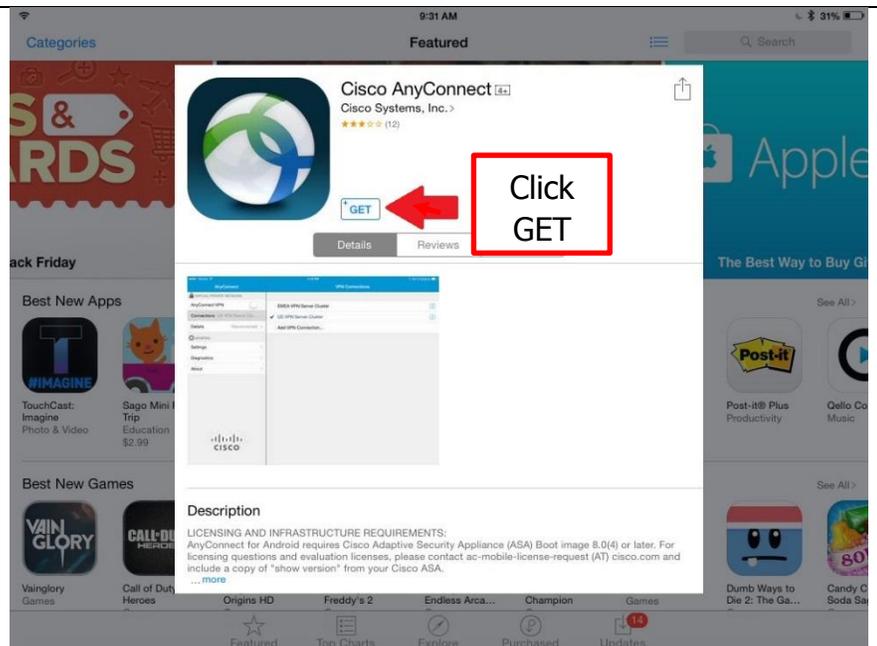

<https://itunes.apple.com/us/app/cisco-anyconnect/id392790924?mt=8>

*(You can also open the AppStore and search for AnyConnect)*

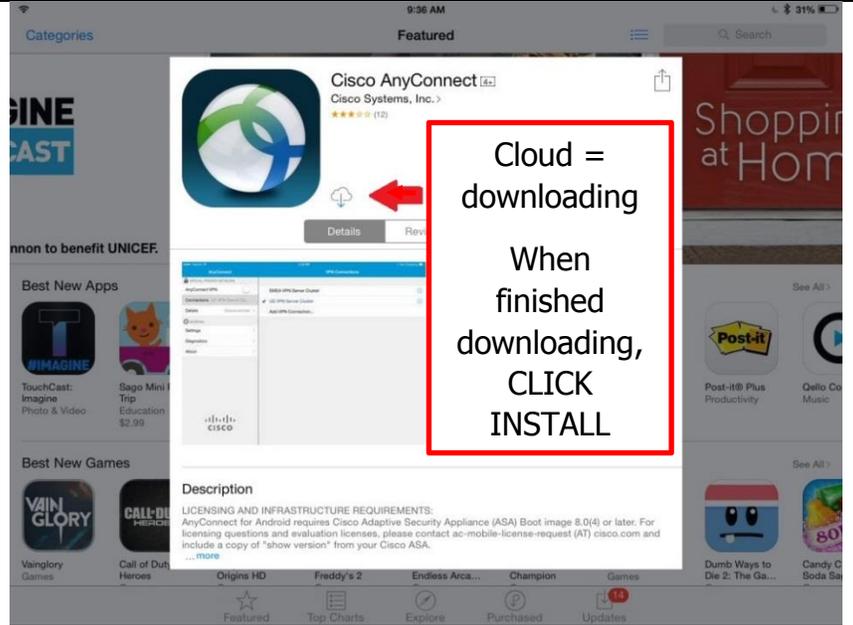

## Step 2

Click the "Get" button to start the download.

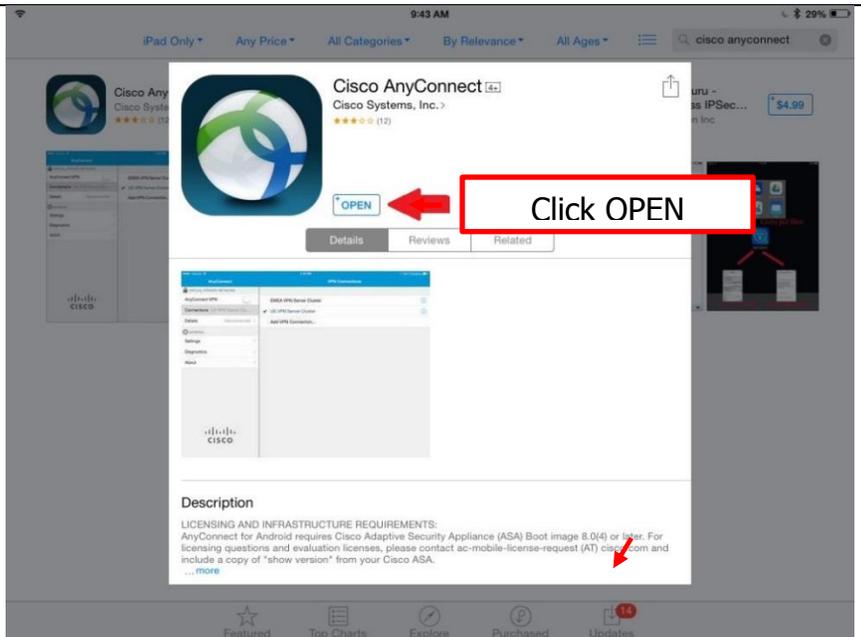

### Step 3

The "Get" button will show a cloud icon while it downloads. Once it turns into an Install button click "Install".

### Step 4

After the installation completes, the icon will change to an Open button, click on "Open".

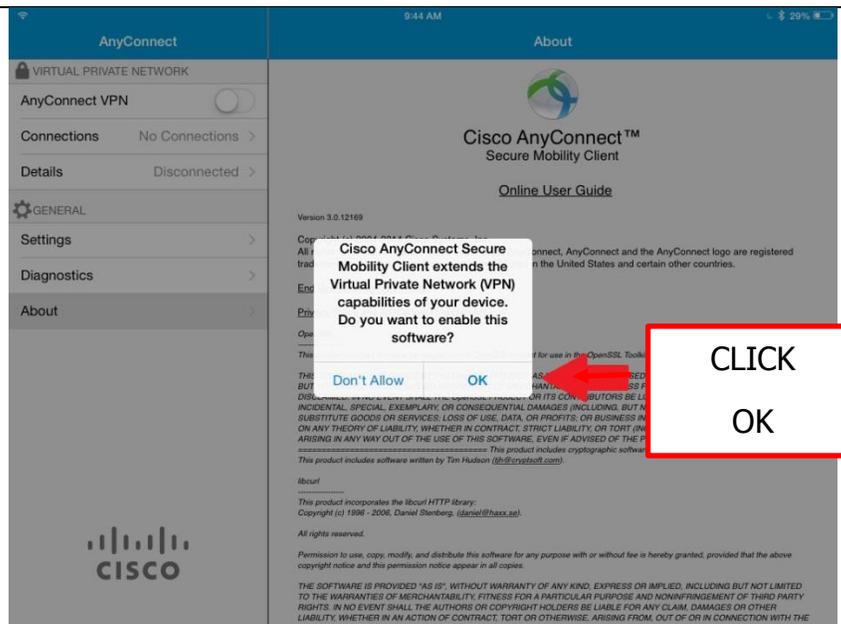

### Step 5

Next, you will see the AnyConnect splash screen.

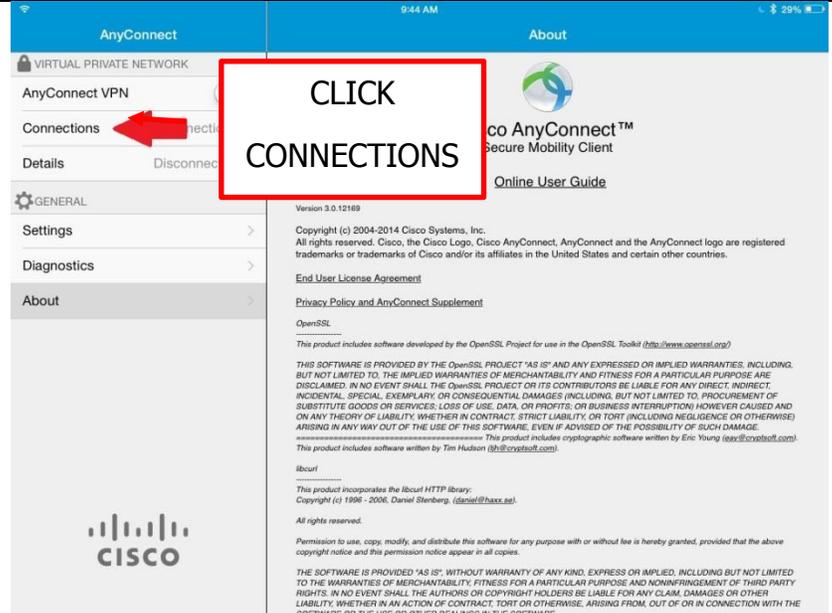

### Step 6

Then you will receive a window asking to extend the VPN capabilities of the device. Click the "OK" button.

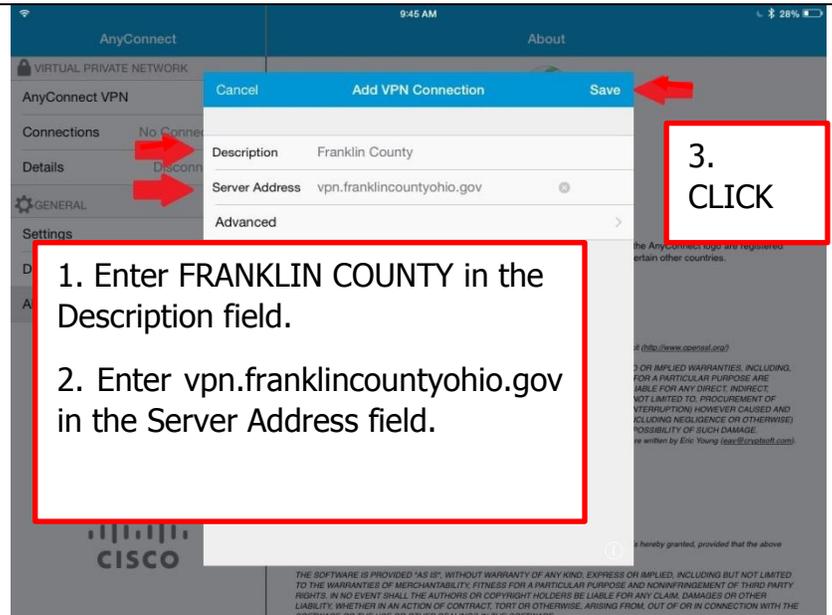

## Step 7

Once AnyConnect opens, click on "Connections" to set-up the new connection.

## Step 8

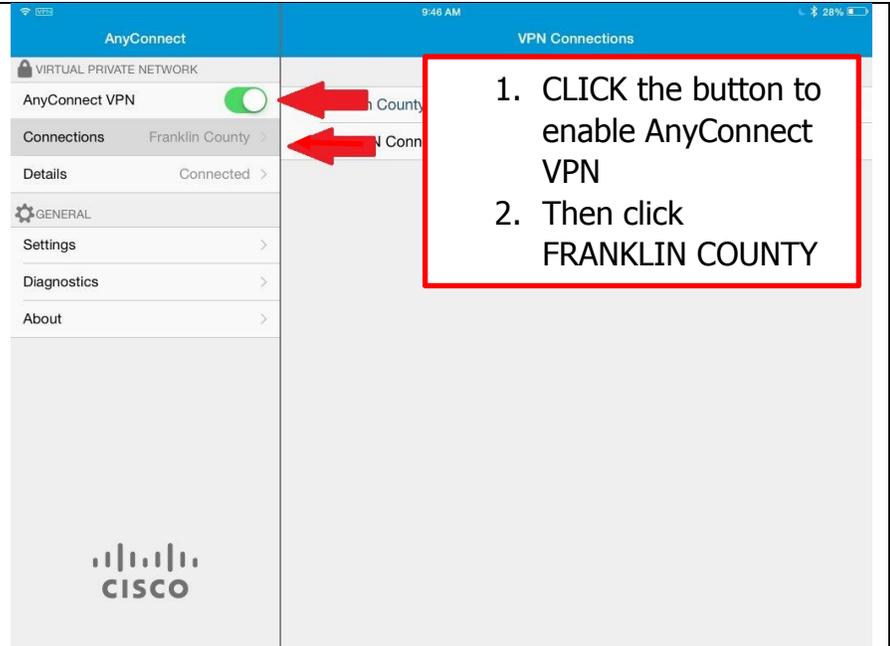

1. In the "Description" field enter Franklin County.
2. In the "Server Address" field enter vpn.franklincountyohio.gov.
3. Then click "Save"

1. Enter FRANKLIN COUNTY in the Description field.
2. Enter vpn.franklincountyohio.gov in the Server Address field.

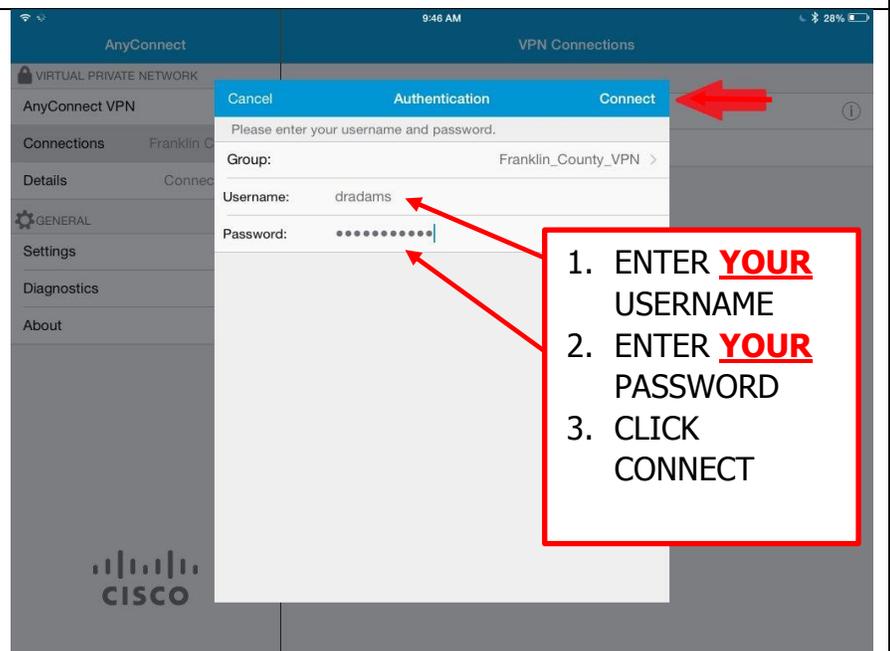

### Step 9

Click to enable "AnyConnect VPN", then click "Franklin County"

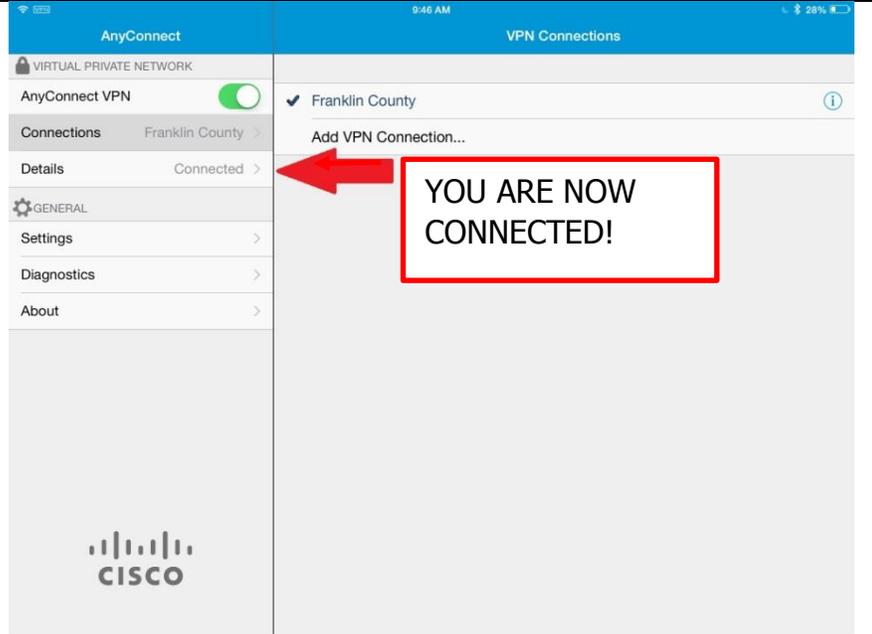

### Step 10

Next, you will be prompted for a user ID (username) and password. Enter your domain ID (username) and password, and then click "Connect".

### Step 11

Once you connect, you will see "Connected" in the "Details" field.

### Step 12

Congratulations! You have successfully installed the new AnyConnect VPN application for the Apple iPad.
